Precipitation probability					
60%	60%	60%	60%	60%	40%

Forecast for Saturday 03 Oct 2020

Weather: A mainly dry start initially on Saturday but soon after dawn an area of persistent, and at times, heavy rainfall will push west across the Lake District, accompanied by fresh northerly winds making it feel very cool. The rain will cause some flooding of smaller streams and footpaths, particularly around the fells in the east. Rain will clear west later in the evening and as the wind begins to ease, fog may readily form.

Chance of cloud free mountain/hill tops above 800m: 10% or less, persistent hill fog throughout the day, any gaps in the cloud are more likely around western fells. Cloud bases are likely to be around 3-500ft.

Visibility: Poor or very poor for most of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling very cold on the hills with fresh northerly winds and persistent rain throughout the day on Saturday, with some localised flooding possible on access roads and water courses.

Forecast for Sunday 04 Oct 2020

Weather: Mainly clear overnight and on Sunday morning with some sunny spells developing. Showers are likely during the afternoon and evening.

Maximum wind: Northeasterly 15-20mph with gusts 25-30mph

Chance of cloud free mountain/hill tops above 800m: 70% chance of clear tops, some scattered cloud around 700-800m is likely.

Visibility: Good or very good, perhaps moderate in afternoon showers.

Temperature: **Valleys:** Plus 6 Celsius rising to 11 Celsius.
At 800m: Plus 8 Celsius
Freezing level: Above the summits.
